

# Moscow State Technical University of Civil Aviation

*Moscow State Technical University of Civil Aviation is a leading aerospace university in Russia which trains specialists in the field of aircraft maintenance technology.*

*The University is the basis of The Educational-Methodical Association of Russian Universities in the field of Aircraft Maintenance and Aerospace Technology.*

*Annually many foreign students from over 37 countries study at the University. The University actively cooperates with many foreign universities.*

*The Training and Scientific-research work of the University is headed by experienced scientists-academicians. There are professors, academicians of different public and scientific Academies in Russia and abroad. The training and research laboratories are equipped with modern equipment, instruments and devices, stands, modern procedural simulators, working models of aviation equipment and knowledge test aids. It makes possible to conduct classes and carry out scientific work at a modern level of science and technology.*

*The practical training of students is held in the Educational Aviation-Technical Centre (EATC) with the help of models of aviation equipment, and in the Educational-Training Centre (ETC) teaching is carried out using up-to-date training systems based on the computer simulation of work procedures for air traffic controllers and aircraft maintenance personnel: cockpits of Airbus and Boeing aircraft and workbenches of the air traffic controllers in Moscow airports are simulated. Innovative training systems based on the modern augmented real technology were developed and used in the teaching process.*

# Moscow State Technical University of Civil Aviation conducts the following training courses

<b>BACHELOR DEGREE</b>		<b>DURATION</b>
25.03.01	Technical operation of aircraft and engines , profile: Maintaining the airworthiness of the aircraft	4 года
	Provision of aircraft flights with aviation fuels and lubricants and special liquids	4 года
25.03.02	Maintenance of aircraft electric systems and avionics	4 года
20.03.01	Technosphere safety	4 года
09.03.01	Informatics and computer science	4 года
01.03.04	Applied mathematics	4 года
23.03.01	Technology of transport processes	4 года
38.03.02	Management	4 года
42.03.01	Advertising and public relations	4 года
25.03.03	Air navigation «Air transport business processes»	4 года
<b>MASTER DEGREE</b>		
25.04.01	Maintenance of aircrafts and engines	2 года
25.04.02	Maintenance of aircraft electric systems and avionics	2 года
<b>SPECIALISTS (ENGINEERS)</b>		
25.05.03	Maintenance of transport radio equipment	5 лет
25.05.05	Operation of aircraft and air traffic management, specialization «Maintenance organizing of aircraft and aircraft electronic equipment»	5 лет
	Operation of aircraft and air traffic management, specialization «Maintenance and repair organizing of aircraft»	
The Pre University course		1 год

*Foreign citizens who speak Russian, pass the admission exams for the first year course at the MSTUCA.  
Foreign citizens who do not speak Russian, have an opportunity to take a one-year Pre University course.  
Students who are trained under 25.03.01 after the third year have an opportunity to study on self-payment basis on Program Type Training Boeing 737-3/4/500 Cat. B1 according to the European requirements on the basis of an European university.*
